Dear Sir:

In response to the Office action mailed July 1, 2004,
please amend the application as follows:

1. (Currently amended) An electrical connector
comprising:

a dielectric housing having a bottom wall that has
opposite lateral sides, opposite lateral walls, each of
which extends uprightly from a respective one of said
lateral sides of said bottom wall and has an upper wall
portion and a lower wall portion, and a partition wall
parallel to and disposed above said bottom wall, said
partition wall extending between said lateral walls and
having opposite lateral ends, each of which is connected to
a junction of said upper and lower wall portions of a
respective one of said lateral walls, said partition wall
cooperating with said lower wall portions of said lateral
walls and said bottom wall so as to confine a first card
receiving space, said dielectric housing further having a
front open side for access into said first card receiving
space, and a rear side;

a cover plate mounted on said lateral walls and
disposed above said partition wall of said dielectric
